ANTHROPOLOGICAL ETIOLOGY OF EPIDERMOLISIS BULLOSA

ANTHROPOLOGICAL STUDY OF EPIDERMOLYSIS BULLOSA SUBJECT PARENTS

Thesis: Epidermolysis Bullosa develops only in children born of parents who's both ethnic climatic anthropological phenotype is not compatible by natural means.

COMMON PATERNS NOTICED:

1. *ONE PARENT HAS HETEROTRICHISIS OF ARCTIC HAIR TYPES*
2. *SECOND PARENT HAS ONE OF THE FOLLOWING TRIACHIUM:*
    a. *UNIFORMED DARK BROWN HAIR*
    b. *HETEROTRICHOSIS OF DARK BROWN HAIR*
    c. *HETEROTRICHOSIS OF MEDIUM BROWN HAIR (NEED FIND PICTURE)*
    d. *OTHER DEFINE AFTER INDIVIDUAL PICTURE HAIR DESCRIBED.*
3. *OTHER KEY INSIGHTS: PHOTOPHEONTYPICAL TRIACHIUM. (Changing hair colors)*

PATTERN STATISTIC BY GENDER AND TRIACHIUM TYPE:

1. *TOTAL PARENT COUPLES: place number here*
2. *PARENTS WITH HETEROTRICHOSIS OF ARCTIC HAIR: place number here*
3. *PARENTS WITH UNIFORMED DARK BROWN HAIR: place number here*
4. *PARENTS WITH _____ HAIR: place number here*
5. *PARENTS WITH SAME UNIFORMED HAIR COLORS: ZERO*

POSSIBLE REASONS OTHER THAN DIFFRENT UNCOMPATIBLE HAIR TYPES:
EXCESSIVE GENE STRIPPING THAT INSTEAD OF AFFECTING JUST THE HAIR IT AFFECTS THE SKIN LAYERS.

Example of "forced gene stripping", "climatic heterogenous gene shedding" that in persons near similar phenotype but climate opposite result in gene since opposite climate genes don't bind well most likely of entire genome set for cold environment not for hot environment. Border line living and migration makes it impossible to accurate determine 100% hair types in near same triachium color-types especially in near black color hairs.

HAIR COLOR CLASSIFICATION DEVELOPED BY EUGENIX ®
FOR MEDICAL AND TRIBAL POPULATIONS STUDIES AND STATISTICS.

A. ARCTICUS HERITAGE COLORS

0. Tribe of Ultra White Arctic Blancus Hair. (Arcticus Blancus) (FFFFFF-FFFFFF)
   Approximate natural climatic territory based on hair pigmentation from 90° N to 62° N.
1. Tribe of Light Blond Hair. (Arcticus Blondus) (FFFFFE- TBA)
   Approximate natural climatic territory based on hair pigmentation from 62° N to 51° N.
2. Tribe of Medium Light Blond Hair. (Arcticus Blondus) (HEX-RGB Range TBA)
   Approximate natural climatic territory based on hair pigmentation from 62° N to 51° N.
3. Tribe of Medium Blend Hair. (Arcticus Blendus) (HEX-RGB Range TBA)
   Approximate natural climatic territory based on hair pigmentation from 62° N to 51° N.
4. Tribe of Medium Dark Blend Hair. (Arcticus Blendus) (HEX-RGB Range TBA)
   Approximate natural climatic territory based on hair pigmentation from 51° N to 42° N.
5. Tribe of Dark Blund/Blunt Hair. (Arcticus Blundus) (HEX-RGB Range TBA)
   Approximate natural climatic territory based on hair pigmentation from 51° N to 42° N.
6. Tribe of Ultra Dark Blund/Blunt Hair. (Arcticus Blundus) (HEX-RGB Range TBA)
   Approximate natural climatic territory based on hair pigmentation below 42° N.

B. COARCTIC BURGUNDUS HERITAGE COLORS

1. Tribe of Light Red Hair. (FFFFFE- TBA)
   Approximate climatic territory based on hair pigmentation from 62° N to 51° N.
2. Tribe of Medium Light Red Hair. (HEX-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 62° N to 51° N.
3. Tribe of Medium Red Hair. (HEX-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 62° N to 51° N.
4. Tribe of Medium Dark Red Hair. (HEX-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 51° N to 42° N.
5. Tribe of Dark Red Hair. (HEX-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 51° N to 42° N.
6. Tribe of Ultra Dark Red Hair. (HEX-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation below 42° N.

C. COARCTIC BRUNETTUS HERITAGE COLORS

1. Tribe of Light Brown Hair. (FFFFFE- TBA)
   Approximate climatic territory based on hair pigmentation from 62° N to 51° N.
2. Tribe of Medium Light Brown Hair. (HEX-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 62° N to 51° N.
3. Tribe of Medium Brown Hair. (HEX-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 62° N to 51° N.
4. Tribe of Medium Dark Brown Hair. (HEX-RGB Range TBA)
   Approximate climatic territory based on historical exposure from 51° N to 42° N.
5. Tribe of Dark Brown Hair. (HEX-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 51° N to 42° N.
6. Tribe of Ultra Dark Brown Hair. (HEX-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation below 42° N.

D. RAFALTIC - AQUATIC BLACK HERITAGE COLORS

0. Tribe of White to Gray Color Hair. (Rafalticus-Aquaticus Albus) (000000-808080)
7. Tribe of Completely Pure Black Hair. (Rafalticus-Aquaticus) (000000-000000)
   Approximate natural climatic territory based on hair pigmentation from 42° N to 42° S.

Scale uses letters and digits to group types of hair and color intensity. Arcticus Blancus hair code uses (0) for natural white color hair. Number seven (7) is used for black color. Digits 0-7 are used to integrate with RGB-HEX binary numerical system. Determine tested hair colors always with the use of chromometer and compere to rest of present and past hair. Scale is intended for the classification of **Ethnic Hair Colors.** Hair color changes from gray and silver to white, from natural black hair because of aging or various medical reasons can be coded as *Albus hair* for what hair can be used code (0) like in the *Rafalticus-Aquaticus Albus* D0.
